

Breaking Bitcoin

Paris, 9-10th September

Sponsorship proposal

The Event

Breaking Bitcoin was born at the climax of the Scaling Debate, we, as a community, had enough of this focus on “scaling” when the real fundamentals are still under-researched. Privacy. Censorship-resistance. Decentralization. All for one ultimate goal: an extremely secure and resilient system to serve as the foundations of future infrastructure, services and products.

Breaking Bitcoin is named after the Scaling Bitcoin conference, but will have a less formal format, less elitist, maybe less “serious” as not debating sides of a war... but still extremely technical.

The Talks

Breaking Bitcoin will host the world-best speakers on their respective area of expertise.

Hardware security, Governance, Protocol-level architecture, Social attacks, from both theoretical and practical perspectives.

The talks will be live-streamed and recorded.

This first edition has a very unique characteristic: Segwit will be live. The Lightning Network and other Layer 2 protocols will be at their very early days on the Bitcoin mainnet, an amazing opportunity from a security perspective!

Details

Breaking Bitcoin will be hosted in Paris, near the Eiffel Tower. The quality of the event is a priority, and will reflect on your brand should you decide to sponsor this community conference.

2 full days of talks and panels, networking evenings, and satellite events around the dates.

150 euro general admissions.

300 participants.

A one-of-a-kind event.
